PROFESSIONAL SUMMARY

Computer Science graduate specializing in AI and Machine Learning with hands-on experience building intelligent automation systems and cross-platform mobile applications. Proficient in Python, Flutter, n8n, and Google Gemini AI. Proven ability to design and deploy end-to-end AI-powered workflows that solve real business problems. Seeking remote opportunities in AI engineering and automation.

TECHNICAL SKILLS

AI & Automation: Google Gemini AI, n8n, LLM Integration, Prompt Engineering, Workflow Automation

Programming: Python, Dart, REST APIs

Mobile & Backend: Flutter, Firebase, Airtable

Tools: Git, GitHub, VS Code

PROJECTS

AI Gmail Auto-Reply System — n8n · Google Gemini AI · Gmail API

- Designed and deployed an end-to-end automation workflow that reads incoming emails and generates context-aware replies using Google Gemini AI
- Eliminated manual email handling with zero human intervention using n8n trigger nodes and conditional logic
- Integrated Gmail API for real-time email monitoring and automated sending

Inventory Management Bot — Python · n8n · Airtable · Gemini AI

- Built an AI-powered bot that processes natural language queries to retrieve and update inventory data in Airtable
- Implemented Python scripts integrated with n8n workflows for automated stock level monitoring and alerts
- Used Google Gemini AI for intelligent query interpretation and response generation

SwimSphere — Swimming Club Membership App — Flutter · Firebase · Dart

- Co-developed a full-featured cross-platform mobile application for swimming club membership management
- Implemented role-based authentication (Swimmer, Guardian, Coach) with Firebase backend
- Built member profile management, subscription tracking, and session scheduling features

EDUCATION

Bachelor of Science in Computer Science

2021 – 2025

Government College University Faisalabad (GCUF) | Specialization: AI & Machine Learning

- Final Year Project: SwimSphere — Flutter/Firebase mobile app for swimming club membership management
- Relevant coursework: Machine Learning, Artificial Intelligence, Data Structures, Database Systems, Software Engineering

CONFERENCES & PROFESSIONAL DEVELOPMENT

International Research Conference on Computing Technologies (IRCCT 2025)

2025
